

Assets, IT & Inventory

Our high performance asset management software has been specifically designed for schools, making tracking IT assets and inventory quick, simple and cost-effective.

Eliminate unnecessary work and expenditure

Expertly developed by our skilled team in conjunction with schools and schools districts around the world, our school management software solutions eliminate unnecessary work and expenditure, allowing you to save time, money and resources.

Enabling continuous real-time visibility of your IT equipment, our Assets, IT & Inventory solution will ensure that you always have a comprehensive and accurate audit trail.

What's more, you'll know which software products you have installed at any one time, and when they are coming up for renewal so you can plan effectively.

And, because our services can be customized, each solution can be tailored to suit the specific requirements of your school district.

“In terms of money saving, we use Parago to assign our 1:1 student devices to students. Our IT and Inventory loss from this take-home technology program is now down to less than than \$50,000 out of more than \$2.4m worth of devices used by students. This is less than the district’s loss of textbooks, and as an accountable government department, we are very pleased with this result. The reporting function of Parago also enables us to know exactly where e-rate funding has been spent, and where those devices are located.”

Barbara Nesbitt | School District of Pickens Count

**Don't just
take our
word for it...**

Be accountable

In addition to saving you time and money, our Assets, IT & Inventory solutions will help ensure that you remain fully accountable across the following areas:

- Insurance
- Asset misappropriation
- Procurement and resource planning
- Audit and asset tracking
- Staff and student loan pool
- Software asset management
- Business continuity planning

Key features:

- Monitor the use of IT equipment and software
- Laptop, PC, Apple, iPad and Chromebook automated discovery agents
- Short and long term procurement forecasts
- Search and report with fully customizable reporting functions
- Mobile app for simple day-to-day tracking, loaning, editing, location updates and auditing
- Add images and documents to room, inventory, pupil and staff records
- Store information safely in the cloud with AWS Amazon
- Links to leading accounting solutions

Product technical specification

Central System Features

- **School-specific development and design**
A product developed with schools, for schools
- **Visual icon-based system for ease of use**
Developed for all levels of user
- **Cloud-based system**
Peace of mind that your data is securely held at AWS Amazon
- **Permissions based multi-user system**
Restrict user access based on permission levels, managed by customizable templates
- **Document importer**
Securely attach documents to assets, buildings, rooms and people
- **Image importer**
Securely attach images to assets and rooms to provide proof of ownership for insurance purposes
- **Customizable reports**
Report on any data behind assets producing accurate forecasts and schedules, all exportable to Office applications
- **REST API**
Enables data links to other software solutions
- **AD/LDAP integration**
Manage Parago users through your domain

PC, iPad & Software Discovery Agent

- **Automatically discovers full PC specification**
Helps plan upgrades
- **Automatically discovers all installed software**
An almost impossible manual task
- **Updates on PC and software changes**
Eliminates time-consuming manual audits
- **Alerts on PC and software changes off-site**
Enables you to track remote activity
- **Automatic relocation of assets based on active directory location or organizational unit**
Removes the need to move assets
- **iPad Agent**
Automatically find all your iPads and hardware detail such as OS version and GPS location
- **Chrome Agent**
Automatically pull information from your chrome books and the Google admin panel such as hardware detail, software and GPS location

Software License Management

- Records all license procurement data
- Defines license type, i.e. site, user, normal & prohibited
- Tracks copies currently in use across the organization's infrastructure
- Alerts to warn if the organization's in-use copies exceed the license quota
- Manage grouped software titles such as MS Office and Adobe suites
- License expiry alerts
- Eliminate or relocate unused software licenses
- Monitor unauthorized software installations
- Software title metering/usage

One-to-One Assignment

- Assign individual assets to staff and students
- Track which assets are on long term loan
- Attach documents to staff and students for audit purposes
- Use mobile technology to assign assets to students and staff on the go
- Full asset audit trail that shows where assets have previously been assigned
- Funding contribution data fields, alerts and reporting

IT & Inventory Management

- **Disposal system**
Three stage disposal process with user specific permissions
- **Asset audit history**
Records movement and data changes to inventory
- **Multiple data fields behind every asset**
Data fields relevant to each asset type
- **E-Rate and funding data fields**
Funding specific fields for detailed finance reporting
- **Custom data fields**
Create your own specific fields against assets
- **Asset category**
Designate a category for every asset for accurate filtering, reporting and accounting
- **Depreciation module**
Straight-line and reducing-balance depreciation specific to individual or asset categories
- **Power and CO2 consumption calculator**
See your IT energy usage costs and show potential savings
- **Multi edit and search**
Change common data fields across multiple assets
- **Contents value calculator**
Specified contents and room values giving real estate value for insurance premiums and claims
- **Store improvements financial reporting**
Virtual areas to store improvements and fixed assets allowing full financial reporting on capital expenditure

Parago Mobile App

- **Smart phone technology for all iOS and Android devices**
Compatible with your existing inventory
- **Add new assets**
Manage new inventory whilst on the move
- **Track and edit assets**
Manage the movement and edit existing inventory through barcode scanning
- **Virtually eliminate asset audits**
Reduce time taken on annual audits by an average of 88%. Get alerts for new, moved and missing assets
- **Record electrical equipment testing**
Audit and test simultaneously
- **Add photos**
Attach photos of assets, rooms and documents for insurance and premises management
- **Multi-location tracking & auditing**
Ideal for multi-site support staff
- **Wireless & 3G/4G connection**
Keeping connectivity costs down
- **Offline functionality**
Continue tasks regardless of internet connection
- **Integrated helpdesk**
Ticket response and automated alerts
- **Attach images & documents to helpdesk tickets**
Ensure staff members gather information on the move
