

Capital & Project Management

Simplify the management of your capital projects

Centrally create, track, manage and assign tasks for your projects. Schedule and organize your projects and plan your required budget to ensure you are fiscally accountable.

Less stress, more control

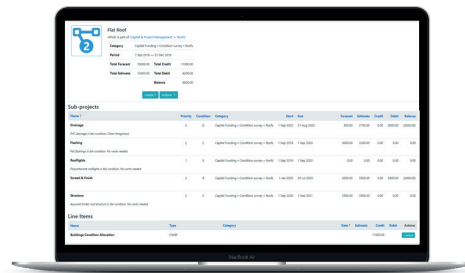

You are in control of your projects, actions, delegations and budgets. Parago helps you to stick to your budget with procurement forecasting and allocation tools.

Improve project organisation

Streamlining your projects makes it easy to organize and plan with other departments in the school or trust. Centralizing timelines and actions improves communication with teams and ensures everyone is on the same page, with projects, tasks and deadlines.

Save time and money

By adding forecasted costs from your surveyors and estimated completion dates and times enables you to accurately apply for the relevant budget needed to complete your project.

Easily analyze your projects

With our customizable dashboard and reporting engine, you can extract the key data you need for quick, in-depth analysis. Share your projects with stakeholders and senior leaders for reports, presentations, approval and review.

Key takeaways:

- 1 | Improve organisation and ensure accountability
- 2 | Store all quotes and debits in one place for easy comparison
- 3 | Have central control of budgets and allocation for your projects

"Having an overview of our total spending means we can safely avoid making any unnecessary purchases.

The system is very easy to use and has made it possible to train staff across all our sites on how to manage their own assets."
