Dashboards & Reports

Make better decisions with fully customizable reporting function and dashboards

Parago's dashboard and reporting tools give you a visual representation of operational management data for your school or district. Easily see the status of your maintenance checks, asset management, incidents, risks and contracts throughout your district. We help managers have a complete overview of all school operations and enable you to quickly spot red flags before they become a problem.

Real-time monitoring of operations for quick responses

Save precious time and ensure you always know what's going on in your schools or district by instantly analysing information through simple selective condition fields.

Prove compliance

Schools and districts often need to prove compliance and accountability. Parago's straightforward exporting tool enables you to share your data in easy-to-read format for auditors, OFSTED inspectors and Senior Leadership Teams. We provide you with ready-made reporting templates and give you the tools to create your own customized dashboards and reports. See the exact data you need!

The big picture and the detail

Effortlessly use the dashboard and reporting software to be more financially efficient, compliant and accountable. We give you the central view you need to see all key operational areas across your schools. Districts can aggregate data to report on all schools within the district from one central location. You can dive into the dashboard segments to see specific information for any school, asset, compliance check or contract.

Key takeaways:

1 | No more hard-to-read spreadsheets; all your data at a glance

2 | Focus on relevant information by segmenting data

3 | Get a top-down visual overview or take a deep dive into your data

"One of the things we were impressed with is Parago's knowledge and understanding of what a District needs to successfully operate when it comes to asset, IT and inventory management. This shows through the product's developments and consultative approach"

Pete Just, Metropolitan School District of Wayne Township
