

Parago: a complete system

Digitise and streamline your school's operations management processes

We believe schools should work smarter, not harder.

For over ten years, we have provided the tools to help schools and trusts to save time, money and resources while keeping on top of legislative compliance.

Parago enables schools and trusts to achieve their goals with one integrated, centralised system for all operational management needs.

We work closely with schools to create a system that not only meets current requirements, but can help them adapt to change. We continuously make development upgrades to the system and we're delighted to have passionate customers working with us.

Asset, IT & Inventory

Easily manage, track and audit your assets and devices

Premises & Compliance

Achieve total compliance with comprehensive checklists

Helpdesk Ticketing

Manage IT and premises issues using a simplified workflow

Risk Management & Forms

Innovate and streamline your risk management and analysis

Incident Management

Simplify the tracking and management of your incidents

Workflow Manager

Digitise dynamic and static workflows to reflect processes

e-Sign Document Manager

The paperless distribution of policies and documents

Contract Manager

Transform your contracts from passive lists to proactive tools

Capital & Project Manager

Simplify your condition survey management and other projects

Room & Asset Booking

Utilise your buildings, rooms and assets more effectively

Multi School Account Manager

Manage operations as a trust or federation: standardise compliance, track estate management processes, share resources and centralise reporting

"Parago makes my life easier by simplifying and quickening tasks which used to take much longer, I have less paperwork lying around as it's all saved on the system and I can produce reports in a few clicks and a matter of minutes."
