

Multi School Account Manager

Manage trust-wide compliance, standardise estate management processes, share resources and centralise contracts across all your schools

We developed the Multi School Account Manager in collaboration with trusts to help you work smarter, not harder! Our software makes it easy for you to set and streamline your standards, SLAs (Service Level Agreements), resources, contracts and compliance management across your organisation.

You set the standards

We know that every trust operates differently. Parago provides you the flexibility to set rules and standards across your trust to achieve the optimal level of compliance, preventative maintenance, risks, incidents, central support, IT and finance.

No more endless spreadsheets or frequent site visits

Cloud and smart phone technology enable you to move away from unreliable spreadsheets that cause unnecessary work for your staff. All data entered at school-level regarding operations management is aggregated to reports and dashboards at trust-level. Meaning you can manage and track your schools' progress from the comfort of your desk.

Measure compliance and prevent issues

You can measure, filter and analyse your data to spot central and local issues before they become a problem. Easily measure compliance across the entire organisation at a glance with dashboards and reporting tools. What's more, with customisable SLAs, you can ensure compliance and risk related tasks are actioned accordingly depending on the outcome of check results at each school.

Key takeaways:

- 1 | Set your trust standards and working processes
- 2 | Define and automate workflow processes across your trust
- 3 | Aggregate trust-wide Dashboards and Reporting

“ Trust-level supporting has become quick and easy with automated processes, enabling us to make better procurement forecasts and save precious time and money”

Jai Solanki, Trust IT Manager,
Hamwic Education Trust
