

# Premises & Compliance Management

Reduce risk, keep on top of compliance checks and give all stakeholders peace of mind.

Automate the scheduling and planning of compliance checks within one central system. Parago gives you full oversight and control of all maintenance works and Health & Safety checks happening across your sites, including helpful daily to-do lists via mobile app. You'll always know what checks have been completed, what's been missed and what's upcoming.

### Never miss a compliance check

You'll always be reminded of when and where a check is due, thanks to automated email alerts. With smart data fields, our fully customisable system enables you to set how often you need checks completed and when you need to be prompted.

### Pre-define 'pass' and 'fail' checks

Use intelligent forms to set conditions to automatically decide whether a check passes or fails. For example, if a tap temperature is too hot or too cold, it'll instantly fail. An automated Helpdesk ticket will be created and alert the appropriate person or team to ensure this issue is fixed urgently. You can add parameters to any check!

### Manage risks without hassle

Easily integrate with our Risk Management & Forms tool, where you can link Health & Safety checks to risk assessments and produce matrix tables. You can raise and assign outstanding actions to ensure complete compliance in your school.

### Key takeaways:

- 1 | Peace of mind, with oversight of your school or trust's compliance
- 2 | Never miss a deadline with automated to-do lists and reminders
- 3 | Evidence compliance to inspectors, governors and board members

"We required a system that was easy for all staff to use, but also gave reporting and dashboards at trust level.

"System set up was quick and efficient despite 25 schools across the trust. Our compliance checks were in for every site in less than half a day."

**Carol Mitzi**, Compliance Manager,  
Co-op Academies Trust
